SELECTADNA™

DNA FORENSIC PROPERTY MARKING

REDUCE THEFT AND BURGLARIES BY UP TO 85%

Criminals hate DNA – it links them to crimes they commit. That is why we have developed a true DNA Forensic Marking system to protect your valuable assets. Since its launch, SELECTADNA has been achieving some incredible results in crime reduction. One Police force reported a reduction in burglaries of 85% where SELECTADNA was in use. It really is that effective.

As figures like this suggest, SELECTADNA acts as a superb theft deterrent, but, even if a marked item is stolen and recovered by the Police, its return is almost guaranteed. The water-based adhesive solution contains thousands of tiny Microdots to identify who the item belongs to. If the Police can't locate one of these, a unique DNA contained throughout every molecule of the adhesive means that positive identification can still be achieved by forensically analysing a tiny sample of the solution.

"Using SELECTADNA as part of a package of burglary reduction measures has had a real and lasting effect on our local community, reducing the fear of crime as well as actual levels of crime."

- The application procedure takes just a second per item. White when applied and clear when cured. Warning labels deter the theft of marked items.

- **SELECTADNA** fluoresces blue under UV light, aiding the collection of samples for Police examination and analysis.

- Each pot contains a unique DNA plus 1000's of microdots containing the registration code and database telephone number, as shown in the image opposite (100x)

SELECTADNA is the only true DNA marking chemical and the only system to offer 100% security. There is a one-off purchase price which includes registration on our secure LPCB approved Database with no additional annual renewal charges.

- **No annual licence fee**
- **Data held on our LPS 1224 database, available 24/7**
- **Official Police approved product**
- **Easy and quick to apply to any valuable property**
- **Microdots for immediate identification**
- **Environmentally safe and non-toxic**
- **Medium and large commercial kits come with a repeatable DNA**
- **Ideal for use at home or in the workplace to mark any valuable property such as IT equipment, AV equipment, antiques, tools, garden furniture, sports equipment, plant and machinery, motorbikes, vehicles, sat nav's... the list goes on**

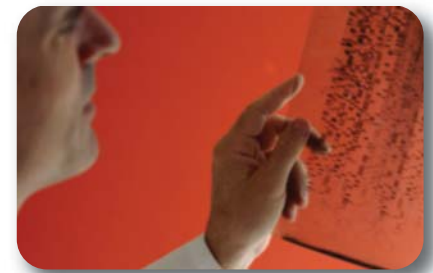

Individual kits supplied for:

Residential properties
Businesses and Offices
Schools, Colleges and Universities
Hospitals and NHS Trusts
Museums and Galleries

Kits supplied in bulk for:
Police
CDRPs
Community Safety Partnerships
Neighbourhood Watch Schemes
Housing Associations
Insurance Companies

The DNA taggants in **SELECTADNA** are used worldwide for a number of security applications, such as the detection of parallel trading and counterfeiting of high value branded goods, authentication of components, the identification of environmental pollution and cash protection in ATM's.

SELECTADNA is a unique DNA forensic marking system which can apply an infinite number of unique codes to almost any item of property. Marked items can be identified unequivocally to provide proof of ownership.

SELECTADNA™ increases the criminal's risk of arrest and helps prevent future thefts and burglaries
